

## Full Stack Developer

### Description

Full Stack Developer required to join a small, agile development team in a friendly environment working on an established software platform for Health & Safety and Risk Management. The role will include both some degree of defect resolution and making feature enhancements to QUOODA products, working in conjunction with the product management team to arrive at well-designed solutions that best benefit end-users. You will work as part of a team to produce software that allows clients to keep up to date with procedures and requirements in the property market, leading to safer more compliant buildings and structures. You will need to be a high performer contributing to frequent new releases to make sure the software is delivering the best solution to the customer.

Join us and help deliver the future of the product. You will focus on ensuring the QUOODA® Platform is top of mind for all medium and large enterprises in need of a holistic workplace risk management software solution, and that we are making use of all avenues to expand our prospect base. Your work will impact all of our potential customers including some of the leaders in their industries, as you evolve how they find out about our risk management platform and how it enables them to build a better and more resilient workplace.

The ideal candidate should be ready to work in a dynamic, 'start-up'-style environment where shifting between multiple workstreams may be required. This is an opportunity to learn and implement best practices for development, design, review, and testing, working to an Agile development and delivery methodology whilst we continue to evolve our core product suite.

### Experience

**We are looking for someone who has:**

- 5+ years' hands-on experience with development of C#, MVC5, Asp.Net applications, Entity framework, SQL/EF/Razor/Kendo
- Good foundation in Object-Oriented Development (OOD) practices and SOLID principles
- Confident in writing front-end Javascript (jQuery)
- Able to articulate application issues with seniors and consider pragmatic solutions
- MS SQL Server and strong SQL knowledge, SSRS
- Experience with Microsoft Visual Studio, PowerShell and/or other scripting languages, source control tools (git), bug-tracking systems e.g. Jira etc.
- Team-player, with quality focus to deliver
- Active participant in the team and agile process

### Beneficial experience:

- Experience with Microsoft Visual Studio, PowerShell and/or other scripting

### Hiring organization

Sustainware Ltd
